Tas Aranasa Pass, Galviston, Sabine Pass and Blue Sird Harber Appropriations as the Bill Now Stands

Correspon tence of the Gazette.

Washington, April 24 -The debate on the river and harbor bill still contintinues, and the Texas delegation are making a strong fight for appropriations for the waterways of that state. Mr. Crain endeavored to have the appropriation of \$100,000 for Aransas Pass increased to \$150,000, but falled. He submitted the following letter from the engineer of the harbor improvement at Aransas Pass, Mr. C. H. Butts, in support of his proposition to increase the smount of the appropriation:

ARANSAS Pass, PEX , March \$0, 1888 -Sin: 8 I nave been for years in local charge of the harbor improvement conduc ed by the United States government at this pass and am at present inspecting is being carried on under contract. I am cumbent upon me to say something in reperfectly familiar with all things pertaining to the paus and its improvement. I rents, with their effects, a study, and I desire to express my sincere regret that have carefully noted the result of all anything like sectionalism should have penied to me to address you, calling your lines; but we conceived that the only interested in this work, and exert all limits of a state, but because they were your powers to have the amount increased harbors that belonged to this great govdollar possible.

vital importance to them, as the develop-

It should give to the appropriations we made these reports; refuge. There is not a port on the coast at all times, we did most generally adhere these considerations in view, I suggest the improvement of these different of our engineers. The people of Texas that our representatives make a study of points. the results siresdy obtained with the money expended here. The reports of veston. This is a great commercial em- for success only by the adoption of the the United States engineers show that porium of the great state of Texas. It is plans of Eads at the mouth of the Misthe results promised were very nearly obtained under most unfavorable circumstances, and will satisfy any observing that had the amounts they recommended as asked for been appropriated, those results would have been realized. This bar was deepened, by government work, from 6 feet in 1879 to 104 feet-both at mean low tide-in 1884, and that

gress to appropriate and place in his hands sufficient furds to enable him to veston. A large amount of money was carry his projects to a speedy and suc-

demand more attention than ever before.

You will observe, sir, that I do not ad-dress you by virture of my position, but as a citizen, by request of my fellowcitizens on account of my long acquaintance with the work and thorough knowlbar and pass. Yours, most respectfully, C. H. BUTTS,

Rockport, Texas. Hon. W. H. Crain, M. C., Washington, D. C.

The debate on the question of appropriating \$500,000 for Galveston harbor and we, adhering to the rule that was was interesting and spicy, being con-adopted in other states, and to which I was interesting and spicy, being conducted by Mr. Boutelle of Maine, Mr. Bayne of Pennsylvania, and Mr. Stewart of Texas. Mr. Boutelle quoted from speeches made by Mr. Mills and Senator Resgan in 1885 (then a Representative), is which both of the Texas member stated that the proposed improvement of | veston. Galveston harbor was absolute waste of time and money, from which no actual

practical benefit would ensue. Mr. Boutelle said: I call the attention the Hon. Mr. Reagan, then a Representative in this body. He was at that time gress, and sinc: he made that speech he required.
has been sent to the Senate, perhaps on Galvest account of the frankness with which he denounced such proposed expenditure of large and steadily increasing trade. The the public money at that time.

on these jetties for the improvement of some \$73.000,000. There is a tonnage the channel of Galveston:

the harbor of Galveston. It has required expenditures there to be made under the

this expenditure of money on Galveston

It is true \$1,500,000 have been expended from first to last, and there is but little difference in the condition of the harbor now and when the expenditure was com-

But, Mr. Chairman, I do not rest my criticism of this project on what has been said of it by the gentleman who has gone to the other House. I desire to call attention to the views expressed on the same subject by a gentleman who now interested. The who holds a very high representative position on the Democratic side, the present chair- I remember well, si holds a very high representative position on the Democratic side, the present chairman of the ways and means committee, a gentleman who is now at the head of a great scheme involving the reorganization of the entire commercial and manution of the country, who certainly ought to be an authority on a question of the country, who certainly ought to be an authority on a question of the country, who can always and that country lying east of the Trinity and that country lying east of the Trinity of the Cotton Exchange and Board of Trade for the city of Houston, which shows that tribution of the entire commercial and manution of the entire commercial and manution of the country, who certainly ought to be an authority on a question of the country, who certainly ought to be an authority on a question of the country, when the honorable der private contract, when the honorable lumber and 80,000,000 feet of shingles. The report on forestry shows that tributions of the country lying east of the Trinity merce there. I read from a report from the Cotton Exchange and Board of Trade for the city of Houston, which shows that tribution of the entire commercial and manution of the entire commercial and manution

o tole proposed expendature: Such was the result of the work of the United States engineers at Galveston. We are told they are men of great learning, that they have been educated at West Mississippi river, and precisely the same at Brownsville that it was at Galveston and at the mouth of the Mississippi tiver, and that is, their success is ex-pressed by the word "failure."

In 1874 they began the work of the imrevement of Galveston harbor by the their devotion to it, and never wavered in undertook to get, that is, eighteen feet of water on the bar. But in 1879 the gabionnade system was abandoned, swept away, and it has gone "where the woodbine twineth." [Laughter]

Mr. Stewart of Texas made a strong speech in favor of the appropriation. He said: I have accorded to the gentleman agent for the government while the work mittee I feel that it is necessary or in-
